Sir:

Responsive to the Official Action of April 25, 2002,
please amend the above-identified application as follows:

IN THE CLAIMS:

Amend the claims as follows:

BT
C1

--1. (amended) A firing device for an injector having a barrel-like body with a sliding trigger on one side to eject the dose from a needle at its forward end, the action of the trigger being forwards against a resistance, the firing device comprising a generally cylindrical housing for the injector, a forward portion of the housing, open at its forward end for projection of the injector needle, containing a locator spring for exerting a light rearward force on the injector to cause the needle to be located within said housing, and a rearward portion of the housing having an axially movable, forward spring-loaded
